Physical Therapy will assist in helping you with mobility. Stick to your treatment plan and be patient in order to see results. Visit for a full list of our services.

Our Physical Therapy will get you moving!

Clayton house

The High Care and ICU Unit consists of isolation cubicles where medically complex patient are treated. It is an environment providing a higher level of individual care and monitoring than the rest of the wards.

These patients are often mechanically ventilated or on High Flow Wall Oxygen. Once they start to recover, they are moved to the general wards in the facility. For contact details visit our website.
